Up your sales game with our gateway tools.

## Benefits of Using PayTrace

### **Build a better payment workflow.**

Businesses are moving at a pace like we've never seen before. Our payment infrastructure grows with you – no matter what pace.

### **Easy and reliable.**

We're always on, with payment acceptance options that deliver uptime of 99.98%. Sign up, get synced, and forget about it. Our technology team rolls out daily updates, so your transactions stay secure.

### **Best rate qualification.**

We sweat the small stuff. PayTrace uses qualified data to ensure merchants can access the best available interchange rates. Our Level II and Level III expertise means you'll see significant savings on B2B, B2G, and large ticket transactions.

### **5-star support.**

We've believed in supporting our products since day one. Our client support team is real and based in the Pacific Northwest. They're available and ready to help you be successful.

### **PCI compliant.**

Security matters. We've created a secure environment so that merchants have less liability. We've assumed the liability of storing credit card data, encrypting sensitive information in our vault with every transaction.

### **API access granted.**

No coding necessary. Use the software you already have with our simple JSON API. PayTrace has dozens of pre-configured integrations you can activate yourself, with leading accounts receivable, ERP, and various web-based solutions.

**PayTrace can easily integrate** into industry leading accounting, CRM and ERP applications. Our gateway offers layers of options for processing card-present and card-not present transactions. This includes sending invoices, storing customer info, recurring billing, ACH, retail, e-commerce solutions and so much more.
